## EXPERIENCE

### DevOps Engineer

#### Blip

📅 July 2022 – Ongoing

📍 Porto

- Worked with tools like Buildkite, docker and AWS.

### System Administrator & DevOps Engineer

#### NOS

📅 February 2020 – July 2022

📍 Campo Grande, Lisboa

- Automated deploys with Jenkins. Configured Networks using F5. Used CI/CD Tools to improve the deployment process. Built an API for password storage and consulting using Python.
- Built a Secure FTP from scratch.

### Software Developer & Data Analyst

#### NOS

📅 November 2019 – February 2020

📍 Campo Grande, Lisboa

- Developed some code to migrate customer data into Redis and Django Databases.
- Used Streamsets to manipulate data and send it to message queues. Reducing deployment time.

### Software Developer

#### COLLAB

📅 July 2019 – November 2019

📍 Parque das Nações, Lisboa

- Developed call center applications and infrastructure in C#, .NET, T-SQL, reports, and more for individual customers.
- Tested Restful APIs with Postman and Soap UI.
- Travelled to Barcelona to work on-site with a customer for 1 month.

## A DAY OF MY LIFE

## AREAS OF INTEREST

Game Development   Game Design   DevOps   Automation  
Scripting   Data Science   Machine Learning   AI

## LIFE PHILOSOPHY

“By failing to prepare, you are preparing to fail.” - Benjamin Franklin

## MOST PROUD OF

### Online Courses

Terraform for AWS - Beginner to Expert

### Keep the Dream Alive

Since February 2023, I've been dedicated to learn and develop a videogame on my own

### Mentoring

Eager to guide and teach young learners and sharing knowledge

## STRENGTHS

C#

Unity

Python

Java

.NET

C

Matlab

Bash

Powershell

CICD

Jenkins

Ansible
